*TELDATUM: 14 FEBRUARI 2015*

## Wintervogels 2014 - 2015

### 5e teldag - 14 februari 2015

Het weer was redelijk. 's Ochtends was het een graad of zes. In de loop van de dag kroop de temperatuur op tot 9 graden. Er stond een matige ZO-wind. Het was jammer dat we te maken kregen met wat motregen. Het zicht was redelijk. Later op de dag liet de zon zich even zien.

Parelduiker en IJsdruiker lieten zich zien langs de kust, waar bijvoorbeeld ook 251 Eidereenden rond zwommen. De afgelopen winter was niet vaak sprake van Roerdompen, maar deze keer zat er weer één in de telling en wel in het prachtige Volgerland.

Er werden minder Kleine Zilverreigers (2) gezien, maar de Grote Zilverreiger (66) was alom te bewonderen. Bij de Hellegatsplaten vloog een Ooievaar over. Bij diverse watervogels kwamen we op lagere aantallen uit. Als voorbeeld noemen we de Smient. In januari nog 11795 en in februari 5139.

In de buurt van Battenoord en Nieuwe Tonge bevonden zich twee groepjes Patrijzen.

Voorlopig is februari met 253 exemplaren de topmaand voor het Waterhoentje (klinkt veel mooier dan Waterhoen).

Erg veel overtuigende Bonte Strandlopers werden gezien op het zuidelijkste puntje van de Slikken van Flakkee.

In de duinen werden twee Houtsnippen gehoord. Of was het toch gezien?

We hadden een beetje hoop op vroeg arriverende Grutto's. Maar slechts op Oostflakkee werden vier exemplaren gezien en gehoord. Voor de andere tellers moet gelden: dan maar iets later.

De Zwarte Zeekoet heeft zich de hele winter laten zien. Op waarnemingen.nl staan heel veel meldingen van heel veel vogelaars, maar het gaat steeds om één exemplaar.

Er werden enkele groepjes rondtrekkende Graspiepers en Veldleeuweriken opgemerkt.

12 Waterpiepers bevonden zich op de Hellegatsplaten. Daar werd ook een Beflijster gezien.

De twee Goudvinken kwamen deze keer uit Polder Het Rietveld op Oostflakkee.

### GANZEN

Zoals gebruikelijk was het aantal Rietganzen half februari al sterk teruggelopen. En waar we in januari al duidelijk minder Kolganzen tegen kwamen, was dat in februari nog verder terug gelopen. Ook dat is in zachte winters niet ongebruikelijk. Er werden nog bijna 7500 Grauwe Ganzen (ongeveer de helft van de vorige maand) waargenomen, zoals steeds verspreid over heel veel verschillende gebieden.

De Brandgans blijft hier altijd veel langer overwinteren dan de drie voornoemde ganzensoorten. 31505 Brandganzen is een enorm aantal. Op en in 't Volgerland, het Oudeland van Ouddorp, de Koudenhoek, de Noordelijke Slikken, polder Oostmoer en de Bommelse Gorzen foerageerden de grootste groepen.

Net als de Brandgans blijft ook de Rotgans hier duidelijk langer. En met 2490 exemplaren telden we er voor onze begrippen tamelijk veel.

### ROOFVOGELS

We telden zeven Bruine en vier Blauwe Kiekendieven. Normale aantallen voor zachte winters.

Aan de lage kant waren de vier Sperwers. Het is te hopen, dat dit komt doordat we meest de buitengebieden tellen en minder in de buurt van de dorpen.

Met de Buizerd gaat het onverminderd goed. Het is opvallend hoeveel er soms vrij dicht bij elkaar in één telgebied zitten.

Een aantal van 30 Torenvalken is zeker niet slecht, maar elke keer hoop je toch dat het resultaat wat hoger uit valt.

Ook nu weer zat de Slechtvalk in de dubbele cijfers.

### ZWANEN

De Knobbelzwaan bleef op het niveau van de laatste drie jaren. In ieder geval duidelijk hoger dan een jaar of tien geleden.

Er werden nog 19 Kleine Zwanen gezien, waarvan 16 op de Zuidelijke Slikken.

De Wilde Zwanen verbleven in polder Battenoord. Daar zaten ze trouwens al enkele weken.

De twee Zwarte Zwanen werden gezien op de Noorder Krammer.

### KRAAIEN

Deze maand werden weinig Gaaien geteld. Opvallend is wel dat de meeste Gaaien altijd in de buurt van Middelharnis/Sommelsdijk worden waargenomen.

In deze februari-telling werd voor deze winter het hoogste aantal Eksters geteld. Dat gold met 702 exemplaren ook voor de Zwarte Kraai.
